### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The title has been changed to --- Method of Protecting a Surface in a Gasifier ---.

The abstract has been replaced with the following abstract: ---

The method of protecting a surface in a gasifier which is normally an exposed surface in the gasifier. The method includes forming a refractory attachment with a securement surface that confronts the protectable surface in the gasifier and mechanically securing the refractory attachment onto the protectable surface in the gasifier without the refractory attachment penetrating the protectable surface. Such mechanical securing is achieved by providing a latch which is formed of complementary shapes of the securement surface and the protectable surface. ---

2. The following is an examiner's statement of reasons for allowance: The method of attaching a protective refractory attachment onto the protectable surface of a gasifier without the refractory attachment penetrating the protectable surface is neither disclosed nor suggested by the prior art. The closest prior art of Brooker et al. (5,941,459) illustrates of attaching a refractory insert (72) wherein the direct heat exposed surface of that insert is flush, being in the same plane, with the gasifier's heat

exposed base surface (76) (protectable surface) (see col. 6, lines 39-49) and therefor penetrates the protectable surface of the gasifier and does not read on the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art made of record is cited only to demonstrate the state of the art. The references have been considered and do not anticipate the claimed invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexa A. Doroshenk whose telephone number is 571-272-1446. The examiner can normally be reached on Monday - Thursday from 9:00 AM - 7:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
